

PHUNG XUAN QUY THANH

FULL-STACK .NET DEVELOPER · BACKEND FOCUS

📞 0975 748 203 • ✉️ phungxuanquythan@gmail.com • 🔗 github.com/Xuanthanh-dzz • 📍 Hanoi, Vietnam •

🚀 Available to start: 11/10/2026

PROFESSIONAL SUMMARY

Full-Stack .NET Developer with 3 years of hands-on experience, including internship experience, with strong expertise in C#/ASP.NET Core Web APIs, SQL Server and business logic. Experienced in backend development plus basic frontend implementation for API integration and end-to-end business workflows. Strongest areas are SQL-heavy enterprise systems, API development, performance optimization and end-to-end coordination between backend and frontend.

TECHNICAL SKILLS

DATABASE & SQL

SQL Server, T-SQL, Database Design, Query Optimization, Stored Procedures

BACKEND .NET

C#, ASP.NET Core Web API, OOP, Dapper, Entity Framework

FRONTEND

Frontend fundamentals, basic UI implementation, REST API integration

ARCHITECTURE & INTEGRATION

RESTful API, Repository Pattern, Shared Libraries, FlexCel, Keycloak

WORKFLOW & TOOLS

Git, GitLab, CI/CD, Database Migration, Docker, Postman

PROFESSIONAL EXPERIENCE

UniCloud — Enterprise Software & Cloud Solutions

05/2024 – 04/10/2026 | Hanoi

Project: Resident — Smart Urban & Resident Management System

05/2024 – 04/10/2026 | Hanoi

Role: Backend .NET & SQL Developer **Team size:** 8 members

Tech: C#, ASP.NET Core, SQL Server, Repository Pattern

- Architected a high-throughput vehicle bulk import engine: concurrently processed 1,000+ Excel records per batch, reducing processing time from 2 minutes to under 3 seconds and eliminating 95% of API-to-database round-trips via a two-tier database-level validation mechanism.
- Contributed to module-level technical design: defined API inputs/outputs, business flows, data structures and Stored Procedures before implementation.
- Developed vehicle card creation, data import and history lookup features in the resident management system.

Project: UniHRM — Human Resource & Payroll Management System

05/2024 – 04/10/2026 | Hanoi

Role: Backend .NET & SQL Developer **Team size:** 10 members

Tech: C#, ASP.NET Core, SQL Server, Dapper, FlexCel

- Optimized social insurance adjustment processing: leveraged Dapper Multiple Result Sets to retrieve master lookup catalogs and reconciliation datasets in a single database query, drastically minimizing network latency and overhead.
- Automated candidate onboarding and interview scheduling workflows: built business filtering logic by organizational unit, batch-grouping candidates to trigger automated push notifications.
- Developed insurance and payroll reporting modules: orchestrated and mapped complex relational data to APIs; flexibly handled dynamic fields, custom aggregation rules, and enterprise payroll cycles.

PROFESSIONAL EXPERIENCE (CONTINUED)

Project: Bizzone & HR Portal — Enterprise HRM Portal

05/2024 – 04/10/2026 | Hanoi

Role: Backend .NET & SQL Developer

Team size: 12 members

Tech: C#, ASP.NET Core, SQL Server, FlexCel, Keycloak

- Contributed to Bizzone maintenance, bug fixes and additional features for Yamaha; developed a shared SQL function for multilingual message resolution.
- Engineered core Stored Procedures for 360-degree competency evaluation reporting: processed multi-criteria evaluation matrices, computing department and company-wide percentile rankings and averages for 5,000+ employees on the Web Portal.
- Automated enterprise report generation using FlexCel: mapped relational database records into dynamic templates, delivering highly accurate Excel and PDF survey evaluation exports.
- Synchronized employee lifecycle workflows and maintained Core HRM systems: implemented automated conversion pipelines from accepted candidates to full-time staff; handled maternity and training bond policies; maintained centralized Keycloak SSO authentication.

EARLIER EXPERIENCE

UniCloud — Backend .NET Intern → Probation

Q4/2023 – 04/2024 | Hanoi

Role: Backend .NET Intern (3-month internship) → Probationary Backend .NET Developer

Tech: C#, ASP.NET Core, SQL Server

- Completed a 3-month Backend .NET internship, then continued as a probationary Backend .NET Developer before transitioning to the official developer role.
- Assisted with API implementation, business-logic changes, debugging and SQL-based data processing while transitioning into the Backend .NET Developer role.

TECHNICAL CONTRIBUTIONS & PRACTICES

- Database versioning and schema synchronization:** established automated deployment workflows via database migration scripts, maintaining absolute schema consistency across multiple environments.
- Shared library maintenance:** engineered and optimized shared enterprise utility libraries (string manipulation, standardized API response envelopes, and centralized configuration loaders).

EDUCATION

Ha Tay Community College

Major in Information Technology

Graduated in 2024
